As a graduate of Computer Science, I have shown great enthusiasm for Machine Learning and Web Development. My successful track record of leadership in various projects and programs at various institutions demonstrates my organizational skills. In addition, I am highly committed to my work, as evidenced by my achievements. I am eager to further hone my skills and make a meaningful contribution to the technology industry.

EDUCATION

Universitas Sebelas Maret

Aug 2021 – Jul 2025

Bachelor of Informatics

- Achieving 3.85 Grade Point Average (GPA)

HONORS AND AWARDS

- **1st Winner and Best Paper of Gemastik XVI 2023 ICT Scientific Paper Category** Sep 2023
My team's paper, "AGU-NET: Attention Ghost U-Net untuk Segmentasi Penyakit Polip Berbasis Citra Biomedis" won in Gemastik's ICT Scientific Paper category.
- **Best Paper of 2025 4th International Conference ICERA** Jun 2025
My paper, "FMDDU-Net: An Effective and Efficient Deep Learning Method for Automatic Colorectal Polyps Detection," was selected as the best paper among all participants.
- **Finalist of GEMASTIK XVII 2024 Data Mining Category** Sep 2024
My team made it to the final round at the GEMASTIK XVII 2024 Data Mining. In the final round, we ranked 8th among 20 finalists from various universities in Indonesia.
- **1st Runner-Up UNS's Most Outstanding Student 2025** Mar 2025
I'm honored to have been awarded 2nd place in the 2025 UNS Outstanding Student Selection (PILMAPRES UNS 2025) at the undergraduate level.
- **Achieving PKM 2024 Funding in the field of Exact Research and PKM-AI 2025** Apr 2024
My team received funding for our proposed research focusing on creating an efficient deep-learning method for automatic colorectal polyp detection.
- **10-Time National Scientific Paper Competition Awardee** 2023-2025
Successfully achieved multiple national-level awards in scientific paper competitions, with a strong research focus on deep learning applications.

EXPERIENCES

- **AI Developer and Web Developer, Fintech Center UNS** Oct 2024-Mar 2025
I've worked as a freelancer at the Fintech Centre of Universitas Sebelas Maret (UNS) as an AI Developer and Web Developer. I developed machine learning pipelines for performing sentiment analysis on survey results using LLM, and built an application guidance chatbot that integrates LLM with RAG.
- **BackEnd Engineer, PT Panensia** Feb 2024 - Mar 2024
I undertook an independent internship at Panensia as a Back-End Engineer. During my internship, I was tasked with developing a web application using Laravel and Vue.js.
- **Machine Learning Cohort, Bangkit Academy** Aug 2023 - Jan 2024
As a cohort member, I learned about machine learning, soft skills, and English.
- **Assistant Lecturer, Universitas Sebelas Maret** Jan 2024 - Jun 2024
Served as an Assistant Lecturer for multiple courses, including Computer Networks, Web Programming, Software Development, Database Systems, Object-Oriented Programming (Java), and Programming Concepts, with responsibilities focused on leading practical sessions and guiding student learning.

PUBLICATIONS

- **Improving Accuracy and Efficiency of Medical Image Segmentation Using One-Point-Five U-Net Architecture with Integrated Attention and Multi-Scale Mechanisms** Jul 2025
Journal of Electronics, Electromedical Engineering, and Medical Informatics (JEEEMI) Scopus Q3

- **FMDDU-Net: an Effective and Efficient Deep Learning Method for Automatic Colorectal Polyp Detection** Jun 2025
2025 4th International Conference on Electronics Representation and Algorithm (ICERA) published in IEEE Access
- **Digital Satellite Image-Based Automatic Building Segmentation Using Pixel Attention Half-UNet** Dec 2024
2025 International Conference on Computer Sciences, Engineering, and Technology Innovation (ICoCSETI) published in IEEE Access
- **ACMU-Net: An Efficient Architecture Based on ConvMixer and Attention Mechanism for Colorectal Polyp Segmentation** Nov 2024
International Conference on Smart Mechatronics 2024 published in IEEE Access

CERTIFICATE

- **TensorFlow Developer Certificate** Mar 2024 - Mar 2027
Demonstrating my ability to build, train, and deploy deep learning models using TensorFlow.

ORGANIZATIONAL EXPERIENCES

- **Ikatan Mahasiswa Berprestasi UNS (IMAPRES UNS)** Nov 2024 – Jul 2025
Administration Division
Manage all administration at IMAPRES, both related to students and UNS officials.
- **UKM P2M FATISDA UNS** Nov 2024 – Jul 2025
Head of Organization
work to develop research and achievements within the scope of FATISDA UNS

PROJECTS AND RESEARCH

- **RoadSafety – Intelligent Web App for Real-Time Pothole Detection using YOLOv8** Mar 2024 – Jun 2024
Developed an innovative and user-friendly web application using Laravel integrated with YOLOv8 for real-time pothole detection and reporting.
- **UrbaNexus - Online District Database Management System using Laravel** Nov 2023 - Dec 2023
Laravel-based Domain management system for managing the database within Cipayung District, Depok.
- **NutriChive: Food Ingredient, Recipe, and Nutrition Archive** Oct 2023 - Jan 2024
NutriChive is a mobile application that leverages machine learning to identify a wide range of food ingredients from images.

SKILLS

Programming Languages:	Python, Java, PHP, JavaScript, C++, GO
Machine Learning & AI:	TensorFlow, Pytorch, NumPy, Scikit-Learn, Matplotlib, PIL, OpenCV, Huggingface, RAG (LangChain), Generative AI, LLM.
Web Development:	Laravel, React.js, Next.js, Vue.js, Express.js, FastAPI, Flask
Database:	MySQL, PostgreSQL, MSSQL, Vector Database (chromaDB, Pinecone, FAISS)
DevOps:	Git, Docker, GCP
